Education

Harcourt Butler Technical University

Dec. 2021 – Present

Bachelor of Technology in Information Technology

Achieved a **7.5 CGPA** across seven semesters, applying knowledge of emerging technologies to real-world projects during the final year.

Experience

Full Stack Developer Intern

July 2024 – August 2024

ONLEI Technologies

Remote

- Designed and deployed scalable full stack web applications using **TypeScript, React.js, Node.js, and Firebase/MongoDB**, achieving a **30% performance improvement** and **25% increase in user engagement**. Integrated real-time features with **socket.io** for enhanced interactivity and responsiveness.
- Created comprehensive technical documentation that streamlines development processes, reducing the onboarding time by **50%** (from 4 to 2 weeks), ensuring smooth knowledge transfer and operational efficiency.

Projects

Real-time Chatting Application

GitHub Deployed

- Engineered a real-time chat application using **React.js, Node.js, Express.js** and **Socket.io**, delivering sub-**50ms** latency for message delivery and supporting **1,000+** concurrent users with seamless bidirectional communication.
- Enhanced application security by integrating **JWT based authentication**. This reduced unauthorized access attempts by **99.9%** and improved customer trust, one of the biggest user concerns.

AI Mock Interviewer

GitHub Deployed

- Architected a voice-based AI mock interview platform using **TypeScript, Next.js, VAPI SDK** and **Gemini AI**; Reduced candidate anxiety by **60%** based on user feedback after **100+ sessions**.
- Streamlined **Firebase Auth** and **Firestore** for secure authentication, user session management, and scalable data storage, optimizing performance across 500+ unique sessions and ensuring persistent user sessions.

Patient Management System

GitHub Deployed

- Mastered a patient management system using **React.js, Node.js, Express.js**, and **MongoDB** to streamline hospital workflows, automate record keeping and improve operational efficiency.
- Constructed a responsive UI with **Tailwind CSS**, enabling seamless access to patient data on various devices, from tablets to desktops, and identified findings to fix the three biggest causes of crashes.

Technical Skills

Programming Languages: C, C++, JavaScript, HTML, CSS. **Databases:** MongoDB, MySQL.

Frameworks & Technologies: ReactJS, NodeJS, ExpressJS, Tailwind CSS.

Developer Tools: Git, GitHub, Postman, Visual Studio Code, Cloudinary, Firebase.

Relevant Coursework: Operating System, Object Oriented Programming System, Data Structure and Algorithm, Data Base Management System, Computer Network.

Achievements

- Achieved a peak rating of **1650 (3 Star)** on **CodeChef** under the handle **aditya_ver11**.
- Achieved a rating of **1446 (Specialist, Top 20%)** on **CodeForces** under the handle **adityaverma1182**.
- Solved **400+ problems** on **LeetCode** and **GeeksforGeeks**, showcasing problem-solving and algorithm skills.
- Won **Chess Tournament 2020**, showcasing strategic thinking and focus. Current **Lichess rating: 1640**.
